HHFA indicator inventory platform

It is essential for a country to review the HHFA indicator inventory platform as part of the HHFA planning process.

- The indicator inventory shows the information that the HHFA can provide
- Countries must decide if this information is what they need

HHFA indicators

Understanding the indicators informs:

- selection of the modules and questions for country implementation

- adaptation of the questionnaire

The indicators are the starting point of the questionnaire adaptation process.

Summary

- The HHFA online indicator inventory platform contains all the HHFA indicators
- The indicators are organized into service dimensions, areas, sub-areas and tables
- A metadata pop-up box displays detailed information about each indicator
- The country questionnaire adaptation process starts with reviewing the indicator inventory

You have now completed Unit 2.

In the next unit, we will look at the types of indicators.

First, try the practice exercise.
